

Good evening parents and players,

I am sure that many of you have heard of the governor's most recent executive order in light of the rising infection rate and in an attempt to help reduce the spread of the virus. With this mandate, there are new sports requirements.

While we have been cautious and conservative in how we have approached practices during this "late summer" off season period, the governor's new executive order requires us to further reduce our group sizes. Additionally, all athletes must now wear a mask during workouts.

We are prepared to continue under the new guidelines through this week. All players and coaches must complete the Soccer COVID-19 Screening the day of training and wear a mask at all times.

We understand with the new restrictions that some families and players may choose to forgo training. We feel with the protocols, as we understand them, that we could follow our original schedule through this week.

Following Thanksgiving week, in the best interest of everyone's health, the coaching staff will suspend training until the regular season starts for the soccer programs.

For girls the first day back is March 1. For boys the first day of season is April 26.

Throughout the open training period and this process, all of the players have been exemplary. They have listened well and done what was asked.

On behalf of the coaching staff, we hope that you have a happy, healthy and safe holiday season. We will miss being on the field with you all and look forward with eager anticipation to resuming training during the regular season.

- Coach Bart
